**ELECTION WITH TRAVERSE**

Assistant Commissioner of Patents  
Washington, D.C. 22039

RECEIVED  
MAR 28 2002  
TC 1700

Sir:

In response to the Official Action of February 26, 2002, in which a one-month statutory period for response was set to expire on March 26, 2002, Applicants elect the invention defined by the Examiner as Group I comprising process claims 1-47, 68 and 69. The above-noted election is made with traverse for the reasons set forth below.

REMARKS

Upon entry of the present election, Applicants will have elected with traverse the invention defined as Group I comprising claims 1-47, 68 and 69.

In the restriction requirement, the Examiner set forth a requirement to restrict the claimed invention to one of two groups of distinct inventions under the provisions of 35

P20416.A07

U.S.C. § 121. The groups delineated by the Examiner are as follows:

I. Claims 1-47, 68 and 69, drawn to a former for producing a tissue web, classified in class 162, subclass 300; and

II. Claims 48-67 and 70, drawn to a process for producing a tissue web, classified in class 162, subclass 109.

The Examiner asserts that the inventions are distinct because the apparatus can be used to practice another and material different process, such as “making tobacco sheets.”

Applicants respectfully traverse this restriction requirement.

Applicants note that all of the claims are classified in the same class, that is, class 162. Accordingly, the recitations of each of the independent claims, as well as the various dependent claims are so closely related for examination purposes as to make the restriction requirement inappropriate. For this reason alone, it is submitted that restriction is inappropriate and that all the claims in the present application should be examined together.

Furthermore, it is believed that Invention I and Invention II are not materially different for examination purposes. The searches are very likely to be overlapping because the process claims recite that the tissue web is produced in a “former.” Thus, no undue burden would be placed on the Examiner when examining all of the claims together.

Moreover, the restriction requirement set forth by the Examiner omits one of the two criteria for a proper restriction requirement now established by the U.S. Patent and

P20416.A07

Trademark Office policy. As set forth in M.P.E.P. § 803 "an appropriate explanation" must be set forth by the Examiner as to the existence of a "serious burden" if the restriction were not required. By virtue of the Examiner's requirement and because the claims of the various groups are so closely related and are all directed to an apparatus and method related to producing a tissue web in a former, it is submitted that there is no serious burden on the Examiner in examining all of the claims together. Furthermore, as noted above, the search for all of the claims includes a significant amount of overlap. Thus, no serious burden would come to bear on the Examiner.

For all these reasons, and consistent with the office policy as set forth in M.P.E.P. § 803, Applicants respectfully request that the Examiner reconsider the position taken in the above-mentioned Official Action and withdraw the restriction requirement in the present application. Accordingly, the Examiner's restriction requirement is believed to be improper and has been traversed for the reasons set forth above.

Nevertheless, in order to be fully responsive, Applicants have elected with traverse the invention defined by the Examiner as claims 1-47, 68 and 69 in the event that the Examiner chooses not to reconsider and withdraw the restriction requirement.

The undersigned hereby authorizes the Commissioner to charge any fee necessary for the consideration of this paper to Applicants' Deposit Account No. 19-0089.
